In response to the Office Action dated October 16, 2002, please amend the above-identified patent application as follows:

IN THE ABSTRACT

Please replace the abstract with the following paragraph:

B1

A latch assembly for a door including a door retainer projection is provided. The latch assembly includes a handle pivotally mounted to the door for rotation about a first end, and a latch actuator contacting the handle and mounted to the door for rotation about a first end. The handle rotates in one direction when actuated and the latch actuator rotates in a second direction opposite the first direction. A keeper is engaged to the door retainer projection in a closed position, and the latch actuator is configured to disengage the keeper from the door retainer projection when the handle is actuated.

IN THE CLAIMS

B2

1. (twice amended) A latch assembly for a door including a door retainer projection, said latch assembly comprising:

a handle pivotally mounted to the door for rotation about a first end;

a latch actuator contacting said handle and mounted to the door for rotation about a second end, said handle rotating in a first direction when actuated and said latch actuator rotating in a second direction opposite the first direction; and
